Summary

Software engineer shipping production systems end to end: multi-tenant AI agent platforms, Android and Flutter apps on BLE and VR hardware, and computer vision. Built the med-tech products that took **1st and 2nd prize at the GSI Hackathon 2026**; first author in **IEEE Access**.

Experience

Azntai (partner company) Remote
Software Engineer, Reznt *Aug. 2026 – Present*

- Top contributor (355 of 738 commits, 142 merged PRs) to Reznt, a multi-tenant AI revenue agent used by paying clients that sells, takes orders and recovers missed calls across WhatsApp, Instagram, Facebook and phone (Next.js, TypeScript, PostgreSQL, DBOS durable workflows, Vercel AI SDK).
- Built Instagram/Facebook OAuth and comment moderation, Exotel voice, usage-credit billing and metering, and hybrid full-text plus vector search; ran LLM evals on prompt caching and model swaps.

Alfaleus Tech (Med-tech startup) Hyderabad, India
Software Developer *Mar. 2026 – Present*

- **Droptor (1st prize, GSI Hackathon):** top contributor (157 of 238 commits) on a BLE smart-cap eye-drop adherence system: Flutter patient app (offline-first, Hive, background sync) and Next.js / Express / PostgreSQL doctor dashboard with WebSocket live updates and PDF reports, live on the Play Store, App Store and droptor.in. Decoded the v2 beacon's split advertisement packets and fixed iOS background BLE scanning through App Store review.
- **VisioVR (2nd prize, GSI Hackathon):** built solo an Android app that simulates 12 eye conditions on the live camera and 360° video in a phone VR headset, using custom OpenGL ES shaders at 60 to 120 fps. Projects a patient's own Humphrey 24-2 field forward in time; a second phone acts as the doctor's remote.
- Ported the iVA+ perimetry suite (4 clinical tests) to the DPVR P1 Pro headset by reverse engineering its undocumented TCP remote-control protocol, adding zero-config device discovery; found a mapping bug that had run the wrong visual-field pattern on every prior exam.
- Sole developer of the company HR platform (Flask, 127 routes, ~33 tables) in production: in-browser face-recognition attendance kiosk, payroll and payslip PDFs, leave accrual and 8 scheduled jobs.
- Mentor and manage a team of interns through code reviews, task allocation and onboarding.

Alfaleus Tech (Med-tech startup) Hyderabad, India
Software Developer Intern *June 2025 – Aug. 2025*

- Led backend development for an internal platform (Flask, PostgreSQL) supporting 3+ production tools across 4 teams.

Imaginate XR (AR/VR simulations) Hyderabad, India
Computer Vision Research Intern *June 2024 – July 2024*

- Optimised a 3D reconstruction pipeline using OpenCV and PyTorch, reducing rendering latency by 30%.

Projects

LamaBots (Lama Labs): RAG WhatsApp Automation SaaS | *Fastify, React, Redis Vector Search, Gemini* 2026

- Top contributor (142 of 334 commits) on a multi-tenant WhatsApp Cloud API platform; built a knowledge-base AI Reply node for the workflow builder, Instagram/Messenger OAuth, and batched embedding ingestion to cut memory spikes.

Quantum-Enhanced Deepfake Detection | *PyTorch, Qiskit, QAOA* 2025

- Quantum-hybrid framework with QAOA feature selection and quantum-inspired attention: +2.5 points accuracy over classical baselines on FaceForensics++ and 45% lower calibration error. Published in IEEE Access.

Visor: Code-to-Flowchart VS Code Extension | *TypeScript, Tree-sitter, Mermaid.js* 2025

- Core contributor (10 merged PRs) to a multi-language flowchart extension with 1.4k+ installs and 73 GitHub stars, featuring bidirectional code navigation and cyclomatic complexity overlays.

Education

Vellore Institute of Technology Vellore, India
B.Tech in CSE (Blockchain Technology), CGPA 9.04 / 10, Top 10 in stream *Sept. 2022 – May 2026*

Publications & Awards

- F. Khan, A. Sareen, A. S. Kumar, M. Bhuvaneswari, "A Quantum-Hybrid Framework for Enhanced Deepfake Detection," *IEEE Access*, vol. 14, 2026. doi:10.1109/ACCESS.2026.3659021
- Glaucoma Society of India Hackathon 2026: 1st and 2nd prize. 3× Merit Scholarship. AWS Certified Cloud Practitioner.

Technical Skills

Languages: Python, TypeScript, JavaScript, Kotlin, Dart, Go, C++, SQL
Frameworks: Next.js, React, Flutter, Express, Fastify, Flask, FastAPI, PyTorch, OpenCV, FAISS, Qiskit, OpenGL ES
Infra & Data: PostgreSQL, Redis, SQLite, Docker, AWS, Railway, GitHub Actions, BLE, WhatsApp Cloud API, LLM APIs
